

Simple Mobile Sales Trigger

Private Label Rights Rebranding Instructions

Thank You for Your Purchase

We at JettDigitals LOVE creating useful software! 99% of the software we release is born from necessity, meaning it is something we created for in-house use. Since we use virtual assistants and also employ high schools kids (interns mostly) everyone must be on the same page. Software like you have purchased allows everyone to use the same exact tools to create end products which are exact.

Something I always hate to touch on, but it is a necessary evil since not everyone in this world is as honest as you©, so please read the below closely.

UNLESS you have bought explicit rights to distribute our rebranding software, it cannot be sold, given away, transferred or uploaded to any online service. The branding software is for your own personal use.

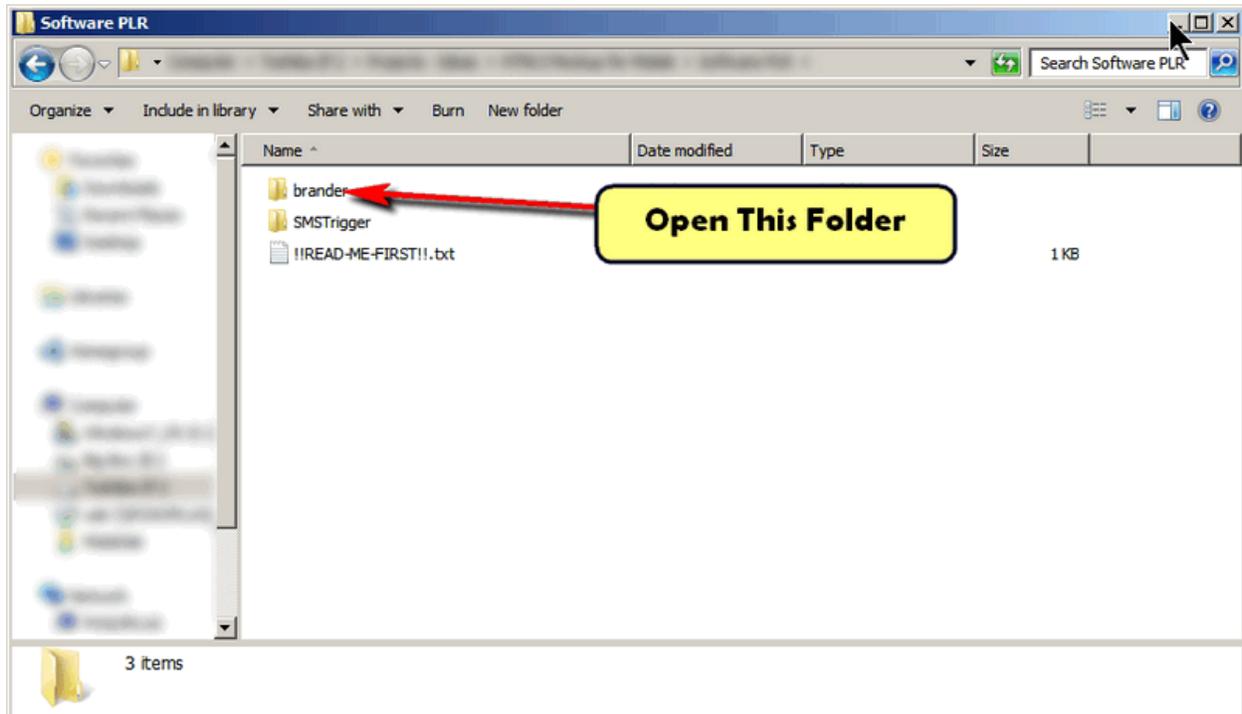

You cannot rebrand the Simple Mobile Sales Trigger software for others. If someone wants PLR like you have bought, use your Affiliate link and earn commissions. JettDigitals owned websites are the only place someone can purchase the PLR branding software. Each software is embedded with buyers email and has a link to report pirates...

Please respect software creators as much as they respect their customers like you.

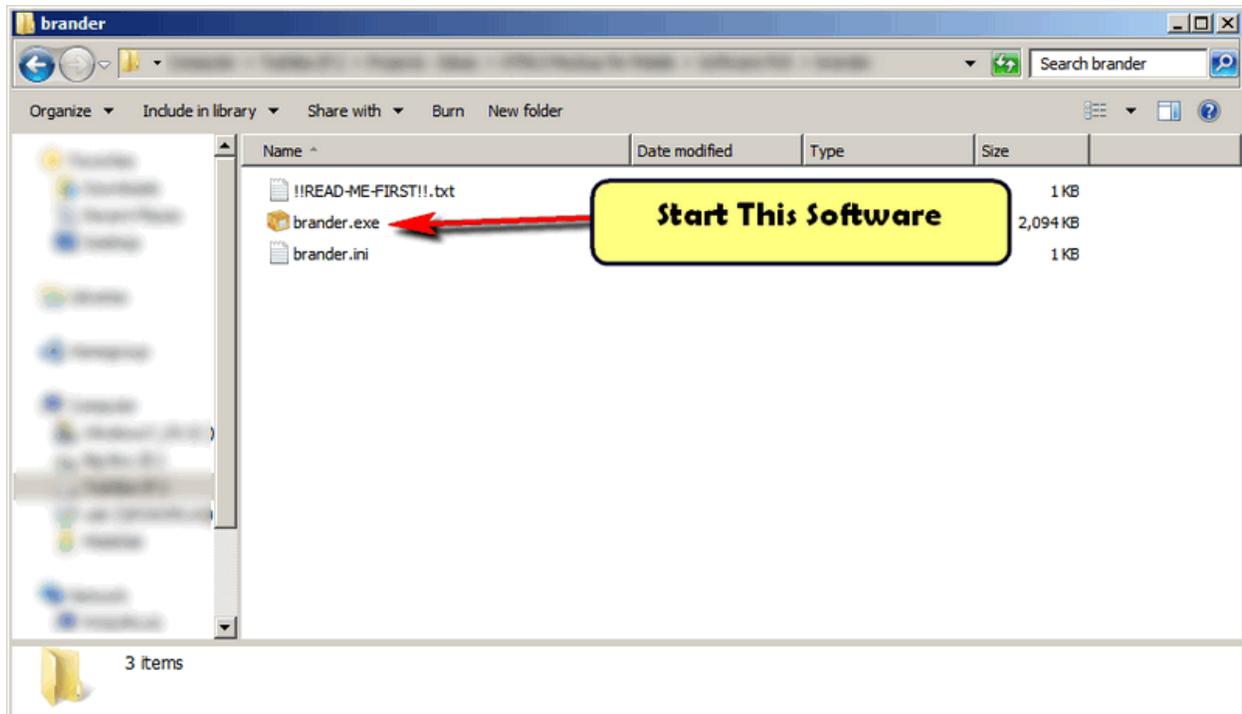

Rebranding

Taking the time to read these instructions will save you much time. Please keep in mind that any question submitted to our helpdesk which is covered here, will be answered as time permits.

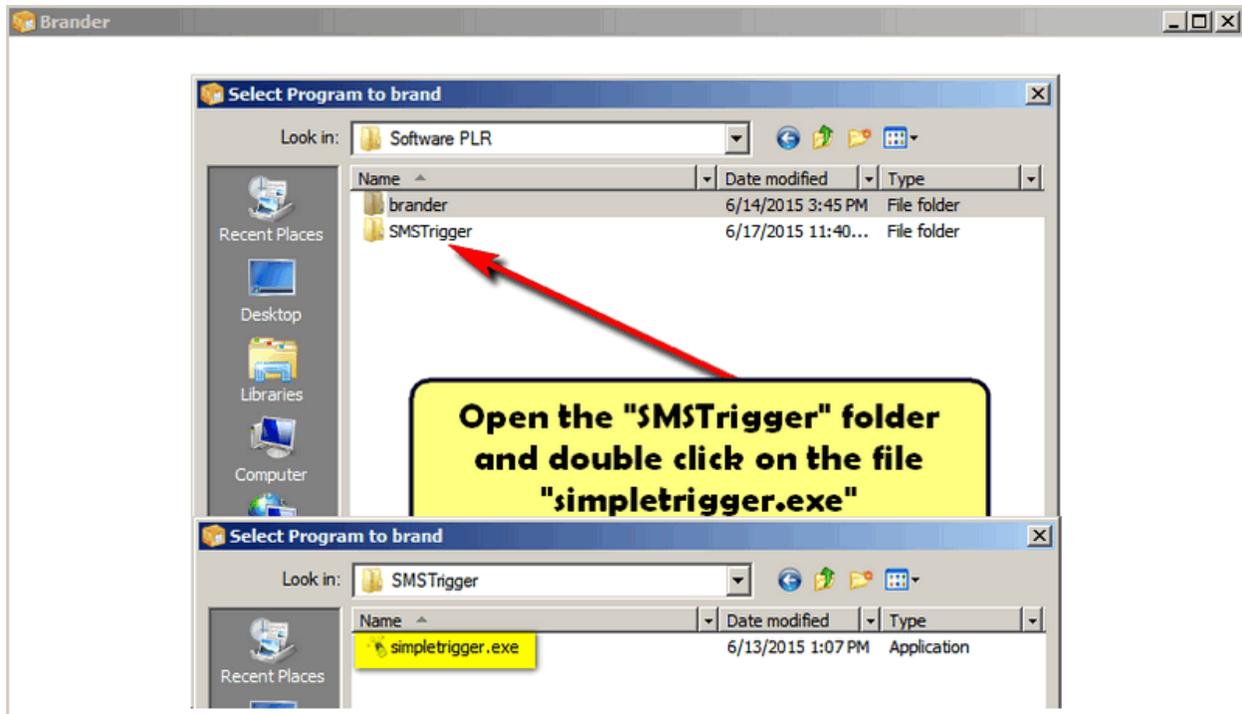

Let's get started.

Navigate to the folder "brander".

Start the "brander.exe" software just like any other Windows software by double clicking on it.

Open the "SMSTrigger" folder and choose the "simpletrigger.exe" file.

Brander

SMS Trigger Exclusive Brander

1 Software Title:

2 Created By:

Optional Link Text: 11

Optional Link URL 12

Is This Brander Pirated Software? Click To See...

13

Time to start the magic!

See below for a brief explanation of each field. You can also see a post I created about branding. Although it features another software title, the process is the same: [Click Here](#)

Info about fields from image above:

- 1) Enter your desired software name. Recommend short and snappy☺.
- 2) Yours or Company name.
- 3) Enter a short description of that the software does.
- 4) Enter FULL URL for the about box link.
- 5) Enter link text which will be associated with above URL.
- 6) Enter FULL URL to your instructions. Can be video, a page or even PDF.
- 7) Upload your new background image. Image size should be 800px wide and 600px tall EXACTLY & in JPG format. Any other size will result in poor results and any other format besides JPG will not work. Keep in mind the text fields will appear in front of any image details. I have provided a plain white JPG image named "Blank BG Example.jpg" in the PLR folder.
- 8) Choose your main text color. It goes without saying but, if dark background image use light color text.
- 9) Choose your URL color. Same applies as above.
- 10) Optional but very powerful IF this option is activated. Firstly, this is NOT to protect the software and only allows one (1) register code. The main purpose of this feature is "adding buyers to your mailing lists".

Reg Code example: 1234-ABC-567-DEF

Register URL example: <http://example.com/your-optin-page/>

The register URL would contain info about software and optin form. What I do is setup my autoresponder service as double optin and when buyer clicks confirmation link, they are sent the reg code.

Again, this it totally optional and if not using leave the "Reg Code Needed" unchecked:

The image shows a form with a checkbox labeled "Reg Code Needed" which is unchecked. Below the checkbox are two input fields: "Reg Code" and "Register URL".

11) Enter your link text for the advertisement placed at bottom of software.

The area is NOT designed to be unlimited and ONLY one (1) line of text. Somewhere are 45 letters/spaces is cutoff.

12) Enter the URL that the above text links to. I HIGHLY recommend you use a URL shortner that you can change later on if need be. This will ensure your links can be changed later down the road, think \$\$\$ and the future...

13) When you have everything entered and confirmed click the "Brand Software" button. This will add your information to the software.

Open up the "simpletrigger.exe" and verify all is correct.

If you wish to create a simple software installer for all the files and make it easy for end users to find later on, check out this tutorial I made: [CLICK HERE](#)

This concludes the branding tutorial.

BE SURE TO CHECK OUT RECOMMEND RESOURCES BELOW!

▶ **Whiteboard Video Creator** – *This is NOT our own product/service.* The bonus promo video we have provided with this package was created using V2 of this excellent video creation software. The V1 has sold over 10K copies and people rave about it, so V2 is set to break sales records.

Version 2 is being released on July 1 and it rocks!
